

November

Continued...

Helping your child at home:

Consider encouraging one- or two-step directions at home; ex. (1) "put your clothes away", (1) "throw away your trash", (2) "dump your bowl and put it in the sink" or (2) "put your shoes on then get your backpack". This will help your child adjust to rules or steps given in the classroom.

Introducing their names (as a word or what their name looks like written out) will also help them. Point out the first letter of their name, as well.

If your child is a slow eater OR comes home with quite a bit of food left; please know we are giving extra time than the amount normally allotted. We know this "time frame" eating is likely new to them and we are also helping open/close bags, snacks, etc. If you have a concern about the food, please let us know. We encourage them to eat with constant reminders during snack or lunch but, we have already doubled our eating times and can only encourage so much. Ice packs are mandatory as are loose drink bottles being placed inside lunch boxes.

Meet Taco:

It has been SO fun getting to know our new class pet. Taco brings the class "clues" on some of the things we are learning. He loves fiestas, and siestas. He loves learning all things new! He loves school and your children love him! ♥

Please, be sure to follow our school Facebook page for current events and updates! @ Faith Preparatory School of Lake Suzy.

It is a lot to take in

We opted to not have a calendar this month but, rather an extensive newsletter. It is a lot to read, consider, and try to apply. Please know that we know the struggle of parenting and how things at home can get overwhelming. We do not want to add to any stress or worries; we just want to have clear communication as most of our class has never experienced a school setting plus Faith Prep running much differently than many schools. Praise God that we have that freedom! Do not hesitate to send a note in your child's folder asking for clarification or help. We love your child and want the best for them!
